Detaljni izvedbeni plan

Akademski godina: 2023/2024	Semestar: Ljetni
Studiji: Komunikologija - Znanstveno istraživanje medija i odnosi s javnošću (R) (izborni) Povijest (R) (izborni) Diplomski sveučilišni studij Povijest (nastavnički) (R) (izborni) Komunikologija - Interkulturalna komunikacija i novinarstvo (R) (izborni) Psihologija (R) (izborni) Sestrinstvo (R) (izborni) Sociologija - Upravljanje i javne politike (R) (izborni) Sestrinstvo (I) (izborni)	Godina studija: 1

I. OSNOVNI PODACI O KOLEGIJU

Naziv kolegija: Multivariate statistical methods

Kratica kolegija: IZBD252

Status kolegija: Obvezni

ECTS bodovi: 6

Šifra kolegija: 252578

Preduvjeti za upis kolegija: Nema

Ukupno opterećenje kolegija

Vrsta nastave	Ukupno sati
---------------	-------------

Predavanje	30
------------	----

Seminar	30
---------	----

Mjesto i vrijeme održavanja nastave: HKS – prema objavljenom rasporedu

II. NASTAVNO OSOBLJE

Nositelj kolegija

Ime i prezime: Šikić Luka

Akademski stupanj/naziv: Izbor: docent

Kontakt e-mail:
luka.sikic@unicath.hr

Telefon:

Konzultacije: Prema objavljenom rasporedu

Suradnici na kolegiju

Ime i prezime: Šagovac Mislav		
Akademski stupanj/naziv:	Izbor:	
Kontakt e-mail: mislav.sagovac@unicath.hr	Telefon:	
Konzultacije: Prema objavljenom rasporedu		
III. DETALJNI PODACI O KOLEGIJU		
Jezik na kojem se nastava održava: English		
Opis kolegija	<p>This course covers advanced empirical research design, including developing questions, creating hypotheses, designing research, and analyzing data. Students will gain hands-on experience using statistical software and learn to properly analyze data using appropriate statistical tests. The course will also cover effective communication of experimental findings, helping students develop skills to communicate their research findings to different audiences effectively. By the end of the course, students should be able to design and conduct their experiments and analyze the data they collect using statistical techniques appropriate for their research questions. They should also effectively communicate their experimental findings to scientific audiences. This will allow them to stay up-to-date with the course content and participate in scientific discussions.</p> <p>In addition to attending lectures and seminars, students will be required to complete a data analysis project, which will be presented as an oral seminar presentation. This project will allow students to apply the data science skills they have learned to a real-world social science research problem. To complete the course, students must accumulate at least 70% of their grade through class activities, including midterm exams and written and orally presented seminar projects. This will ensure that students regularly engage with the course content and actively work towards mastering the skills and concepts covered in the course</p>	
Očekivani ishodi učenja na razini kolegija	<p>1. Develop a thorough understanding of multivariate statistical techniques, including their theoretical foundations and practical applications. 2. Learn to apply multivariate statistical techniques to real-world data analysis problems and research questions. 3. Understand the assumptions underlying multivariate statistical methods and how to assess their validity. 4. Gain experience in using statistical software to analyze multivariate data. 5. Develop skills in interpreting and presenting results of multivariate statistical analyses to various audiences.</p>

<i>Način ispitivanja i ocjenjivanja</i>		
Polaze se DA	Isključivo kontinuirano praćenje nastave NE	Ulazi u prosjek DA
Preduvjeti za dobivanje potpisa i polaganje završnog ispita	Attendance is crucial for success in this course, and students are expected to attend at least 70% of lectures and seminar sessions.	

Final course grade is based on 100 points earned through student's continuous involvement in class activities:

Fair (2) – 50 to 64 points

Good (3) – 65 to 79 points

Very good (4) – 80 to 89 points

Excellent (5) – 90 to 100 points

Način polaganja ispita

Earning credits:

Class activities contribute to 50% of the grade:

Seminar – maximum 40 points

Seminar presentation – maximum 10 points

Final exam contributes to 50% of the grade:

Final exam – maximum of 50 points (50% of correct answers necessary for passing)

Način ocjenjivanja

Class activities: Midterm exam (written), seminar presentation (written and oral) and final exam.

Detaljan prikaz ocjenjivanja unutar Europskoga sustava za prijenos bodova

VRSTA AKTIVNOSTI	ECTS bodovi - koeficijent opterećenja studenata	UDIO OCJENE (%)
Pohađanje nastave	1.5	0
Kolokvij-međuispit	1.8	40
Seminarski rad	0.9	20
Seminarsko izlaganje	0.45	10
Ukupno tijekom nastave	4.65	70
Završni ispit	1.35	30
UKUPNO BODOVA (nastava+zav.ispit)	6	100
