

Detaljni izvedbeni plan

Akademska godina: 2024/2025	Semestar: Nepoznato			
Studiji: Psihologija (R) (izborni) Komunikologija (R) (izborni) Povijest (R) (izborni) Sestrinstvo (R) (izborni) Sociologija (R) (izborni) Sestrinstvo (I) (izborni)	Godina studija: 1			
I. OSNOVNI PODACI O KOLEGIJU				
Naziv kolegija: Applied S	Statistics			
Kratica kolegija: IZBP232	2			
Status kolegija: Obvezni	ECTS bodovi: 6	Šifra kolegija: 252565		
Preduvjeti za upis kolegi	ja: Nema			
Ukupno opterećenje kolegija				
Vrsta nastave	Ukupno sati			
Predavanje	30			
Seminar	30			
Mjesto i vrijeme održava	nja nastave: HKS – prema objavljenom rasporedu			
II. NASTAVNO OSOBLJE				
Nositelj kolegija				
Ime i prezime: Šikić Luka				
Akademski stupanj/naziv:	Izbor: docent			
Kontakt e-mail: luka.sikic@unicath.hr	Telefon:			
Konzultacije: Prema objavljenom rasporedu				
Suradnici na kolegiju				
III. DETALJNI PODACI O KOLEGIJU				

Jezik na kojem se nastava održava: English

	Course Objectives: This course delves into the practical aspects of applied statistics, encompassing the formulation of research questions, hypothesis generation, research design, and data analysis. Students will acquire hands-on experience utilizing statistical software and the correct application of various statistical tests. Furthermore, the course emphasizes the significance of effectively communicating research findings to diverse audiences, equipping students with the necessary skills to present their results coherently. By the conclusion of the course, students are expected to independently design and execute experiments, analyze the gathered data using suitable statistical methodologies, and proficiently convey their findings to a scientific audience. This fosters an active engagement with the
Opis kolegija	research. To successfully complete the course, students must obtain at least 70% of their grade through various class activities, including midterm exams, oral presentations, and the seminar project. This ensures consistent engagement with the course content and promotes the ongoing development of mastery of the skills and concepts explored throughout the course. Course Content: Foundations of Applied Statistics: Introduction to the key concepts and principles of applied statistics in contemporary research
	contexts. Statistical Programming Essentials: Familiarization with programming language for statistical analysis, including basic syntax and functionality. Statistical Concepts Refresher: A review of essential statistical concepts, including probability theory, distributions, hypothesis testing, and parametric and nonparametric methods. Exploratory Data Analysis Techniques: In-depth exploration of data visualization, descriptive statistics, and methods for detecting patterns and relationships in data sets. Confirmatory Data Analysis Approaches: A comprehensive study of inferential statistical techniques, such as regression analysis,
	ANOVA, and hypothesis testing, for validating research hypotheses. Empirical Research Project: Application of acquired statistical knowledge and skills in designing, conducting, and analyzing a real-world research problem, culminating in an oral seminar presentation.

Očekivani ishodi učenja na razini kolegija	1. Develop research questions and hypotheses appropriate for empirical research in social science. 2. Design research studies that incorporate appropriate research methods and sampling techniques. 3. Conduct statistical analyses using advanced statistical techniques to answer research questions. 4. Use statistical software to effectively manage and analyze data. 5. Evaluate statistical models for their appropriateness in answering research questions. 6. Interpret statistical results and conclude them in the context of the research questions. 7. Communicate research findings effectively to different audiences using appropriate visual aids. 8. Develop critical thinking skills to evaluate the appropriateness of statistical analyses for different research questions. 9. Design and conduct an independent data analysis project and present the findings orally to the class.

Način ispitivanja i ocjenjivan	nja	
Polaže se DA	Isključivo kontinuirano praćenje nastave NE	Ulazi u prosjek DA
Preduvjeti za dobivanje potpisa i polaganje završnog ispitaAttendance is crucial for success in this course, and students are expected to attend at least 70% of lectures and seminar sessions.		
Način polaganja ispita	Final course grade is based on 100 points earned through student's continuous involvement in class activities: Fair (2) – 50 to 64 points Good (3) – 65 to 79 points Very good (4) – 80 to 89 points Excellent (5) – 90 to 100 points Earning credits: Class activities contribute to 70% of the grade: Midterm exam – maximum 40 points Seminar – maximum 20 points Seminar presentation – maximum 10 points Final exam contributes to 30% of the grade: Final exam – maximum of 30 points	

Class activities: Midterm exam (written), seminar presentation (written and oral) and final exam
