III. DETAILED COURSE INFORMATION

Teaching Language: English

Course Description	This course explores the multifaceted nature of education, with particular attention to its aims, purposes, and its role in fostering the integral development of the human person. It critically engages with reductionist paradigms that narrow the concept of education and, consequently, diminish the anthropological vision that undergirds it. In contrast to such limited frameworks, the course advances an understanding of education as a fundamental human right oriented toward the cultivation of human dignity and the enhancement of one's capacity for ethical and humane living. Rather than conceiving education solely as a mechanism for producing technically proficient or intellectually capable individuals, the course underscores the necessity of forming persons of virtuous character and moral integrity. Central to this inquiry will be an examination of the ethical dimensions of education, the formative influence of educators and institutions, and the role of character development in educational practice. Special attention will be given to prominent Anglo-Saxon theorists in the field of moral education, whose contributions will be analyzed critically in light of broader philosophical and pedagogical concerns.
Educational Outcomes	 Critically evaluate reductionist paradigms within educational theory and practice. Demonstrate the significance of integral personal formation, integrating intellectual cultivation with the moral development of character. Articulate and analyze foundational ethical theories, examining their theoretical underpinnings and practical relevance to moral education. Engage in critical analysis of contemporary Anglo-Saxon scholars in the field of moral education, assessing the philosophical coherence and pedagogical implications of their contributions. Analyze official Catholic documents on education, evaluating their vision for comprehensive human and moral formation within educational contexts
