Course Description

It is a hands-on, problem-based course with occasional online involvement of experts from various fields during seminars. It focuses on the research of ethical challenges that appear in the modern world and the accompanying responses of recent scientific activities. Some challenges will focus on research findings and frequently repeated public misconceptions. Others will deal with the research process itself and society's efforts to self-regulate. The emphasis will be on current and controversial events and fundamental ethical principles.

	1. Analyze fundamental theories in ethics and reflect on ethical issues in science	
Educational Outcomes	2. Apply ethical theories to controversial issues that arise in science and the modern world	
	3. Critically evaluate various ethical issues
