# Detailed Course Syllabus

<b>Academic year:</b> 2025/2026	<b>Semester:</b> Winter semester
<b>Study Program:</b> Komunikologija - Znanstveno istraživanje medija i odnosi s javnošću (R) (elective) Komunikologija - Interkulturalna komunikacija i novinarstvo (R) (elective) Sociologija - Upravljanje i javne politike (R) (elective) Povijest (R) (elective)	<b>Year of study:</b> 1

## I. BASIC COURSE INFORMATION

**Name:** Technology and Society

**Abbreviation:** IZBD281

**ECTS:** 4

**Code:** 280125

**Prerequisites:** No

*Total Course Workload*

**Teaching Mode**

**Total Hours**

Lecture

30

Seminar

15

**Class Time and Place:** HKS - according to the published schedule

## II. TEACHING STAFF

*Course Holder*

**Name and Surname:** Mihaljević Lucija

**Academic Degree:**

**Professional Title:** docent

**Contact E-mail:**

[lmihaljevic@unicath.hr](mailto:lmihaljevic@unicath.hr)

**Telephone:**

**Office Hours:** According to the published schedule

*Course Assistant*

## III. DETAILED COURSE INFORMATION

Teaching Language: Hrvatski

### Course Description

This course aims to **provide students with a critical understanding of** concepts, theories, and methodologies from a **socio-anthropological perspective** and how they can be specifically tailored for the study of Artificial Intelligence (AI) and its related systems. Taking this approach, the course explores the historical development, application, and societal impacts of AI technologies across diverse cultural contexts.

Special emphasis is placed on critical issues such as cultural diversity, discrimination, algorithmic bias, ethics, and the governance of AI systems. Students will analyze how AI reproduces existing social power structures and consider ways to design more inclusive and equitable technological landscapes.

Through case studies, research projects, and interactive discussions, the course encourages students to critically examine the influence of AI on everyday life, digital ecosystems, labor markets, privacy, and human rights. Additionally, it will address the colonial legacies of technological development and explore decolonial approaches to AI by considering alternative knowledge systems and innovation models. This will include a critical examination of how today's **global and glocal** power centers shape AI infrastructures, influence data governance, and perpetuate digital inequalities.

By the end of the course, students will have developed analytical tools to critically assess the relationship between technology and society, along with methodological approaches for conducting socio-anthropological research on AI within various cultural and political settings.

### Educational Outcomes

#### Knowledge and Understanding

- **Has an in-depth knowledge of socio-anthropological theories and methodologies** relevant to the study of Artificial Intelligence (AI) and its societal impacts.
- **Understands key concepts and debates** in the Anthropology of AI, including issues of cultural diversity, algorithmic bias, ethics, and governance.
- **Is familiar with major anthropological literature on AI and related systems** across diverse cultural, political, and economic contexts.
- **Has proficient knowledge of bibliographic resources and methodological tools** for conducting socio-anthropological research on AI.

#### Ability to Apply Knowledge and Understanding

- **Can critically analyze and articulate** the main conceptual contributions of the socio-anthropological approach to AI.
- **Can apply socio-anthropological perspectives** to examine, discuss, and challenge key issues in AI, such as discrimination, power structures, and digital inequalities.
- **Can integrate anthropological methodologies and theoretical frameworks** into discussions about the social, political, and ethical implications of AI systems.
- **Can critically engage with contemporary debates on AI** in relation to governance, justice, diversity, and decolonial approaches to technological infrastructures.

**Supplementary**

*Examination and Grading*

To Be Passed DA	Exclusively Continuous Assessment NE	Included in Average Grade DA
<p><b>Prerequisites to Obtain Signature and Take Final Exam</b></p>	<ol style="list-style-type: none"> <li>1. Regular attendance – _presence in at least 70% of classes according to the study program and performance curriculum.</li> <li>2. Successful completion of required seminar activities – prepared and presented seminar presentation.</li> <li>3. Acquisition of a minimum success of 35% during classes within the given teaching activities – cumulatively achieved at the seminar presentation and two colloquia</li> </ol>	
<p><b>Examination Manner</b></p>	<ol style="list-style-type: none"> <li>a) Teaching activities – 70% grade               <ol style="list-style-type: none"> <li>1) Seminar presentation – max. 20 %;</li> <li>2) 1st colloquium – max. 25 %;</li> <li>3) 2nd colloquium – max. 25 %;</li> </ol> </li> <li>b) Final exam               <ol style="list-style-type: none"> <li>4) Oral exam – _max. 30% (to pass, it is necessary to answer 50% of the questions asked correctly).</li> </ol> </li> </ol>	

**Grading Manner**

1) Teaching activities - \_seminar presentation; 1. colloquium (written) and 2nd colloquium (written).

2) Final exam (oral).

The numerical scale of student work grading:

sufficient (2) - \_50-64,9 %

good (3) - \_65-79,9 %

very good (4) - \_80-89,9 %

excellent (5) - \_90 to 100 %

**Detailed Overview of Grading within ECTS**

ACTIVITY TYPE	ECTS Student Workload Coefficient	GRADE PERCENTAGE (%)
Class Attendance	0,5	25
Seminar Presentation	0,5	25
Midterm Exam	1	25
Midterm Exam	1	25
<b>Total in Class</b>	<b>3</b>	<b>75</b>
Final Exam	1	25
<b>TOTAL ECTS (Classes + Final Exam)</b>	<b>4</b>	<b>100</b>

**IV. WEEKLY CLASS SCHEDULE**
