**Jezik na kojem se nastava održava:** English

<b>Opis kolegija</b>	It is a hands-on, problem-based course with occasional online involvement of experts from various fields during seminars. It focuses on the research of ethical challenges that appear in the modern world and the accompanying responses of recent scientific activities. Some challenges will focus on research findings and frequently repeated public misconceptions. Others will deal with the research process itself and society's efforts to self-regulate. The emphasis will be on current and controversial events and fundamental ethical principles.
